NOTES

- The test results apply only to the tested samples. Extracts from the test report may not be reproduced without the written consent of the testing laboratory;
- ACLT is not responsible for the accuracy of the information in cases where it is provided by the client;
- Standardized test methods are part of the flexible scope of ACLT accreditation;
- * Within its competence, ACLT is authorized to determine all the characteristics of the marked test method, belonging to the products group, after verification, CRM / RM availability and calibrated technical means;
- ** Repealed standard without replacement;
- ACLT does not report a declaration of conformity and does not express opinions and interpretations in accordance with item 7.8.6 and item 7.8.7 of БДС EN ISO / IEC 17025;
- < limit of quantification (LOQ);
- The reported expanded uncertainty of the chemical tests is based on a standard uncertainty multiplied by a coverage factor k = 2, providing a confidence level of approximately 95%
- The reported uncertainty in microbiological testing is based on a standard technical uncertainty calculated according to ISO 19036, multiplied by a coverage factor k = 2, providing a confidence level of approximately 95%. This does not include matrix or distributive uncertainty;
- This test report was produced electronically and a copy of the document may be issued upon request.
- The sample is provided by the client, the ACLT is not responsible for the sampling / specimen collecting stage.
- Laboratory activities are performed at the address of ACLT.
